

CHATTAHOOCHEE RIVERKEEPER®

Floating Classroom

The Floating Classroom program is an on-the-water environmental education program that teaches science, ecology, history, and math in accordance with STEM goals and state education performance standards.

Chattahoochee Riverkeeper operates a Floating Classroom on Lake Lanier and West Point Lake. In operation since 2000, more than 100,000 students and teachers have experienced the program.

The 40-foot boats serve as floating laboratories to learn about the lake and river system. While on board, students see firsthand their source of drinking water and develop an understanding of it by using scientific equipment to monitor water quality, view wildlife through binoculars, and learn watershed concepts. Takeaways include how to become responsible water stewards by protecting local streams and the watershed from pollution as well as the importance of water conservation in a changing climate. Thanks to the generous support from public and private donors, we are able to offer a limited number of scholarships to students from Title I schools or programs serving students from economically disadvantaged communities.

Lake Lanier Aquatic Learning Center

River Forks Park
Gainesville, GA

Scheduling and scholarship information:
Maranda McGaha, Elachee Nature Science Center
maranda@elachee.org | 770-535-1976

The Lake Lanier Aquatic Learning Center is operated in partnership with Elachee Nature Science Center and Hall County Parks and Leisure Services.

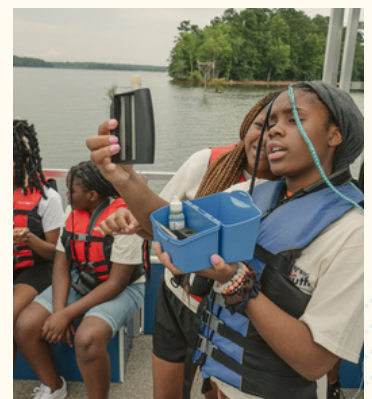

West Point Lake Floating Classroom

Pyne Road Park
LaGrange, GA

Scheduling and scholarship information:
Anna McNamee, Chattahoochee Riverkeeper
amcnamee@chattahoochee.org | 706-416-9241
